01 — Splash Screen

PURPOSE

App logo and Digital Khata name

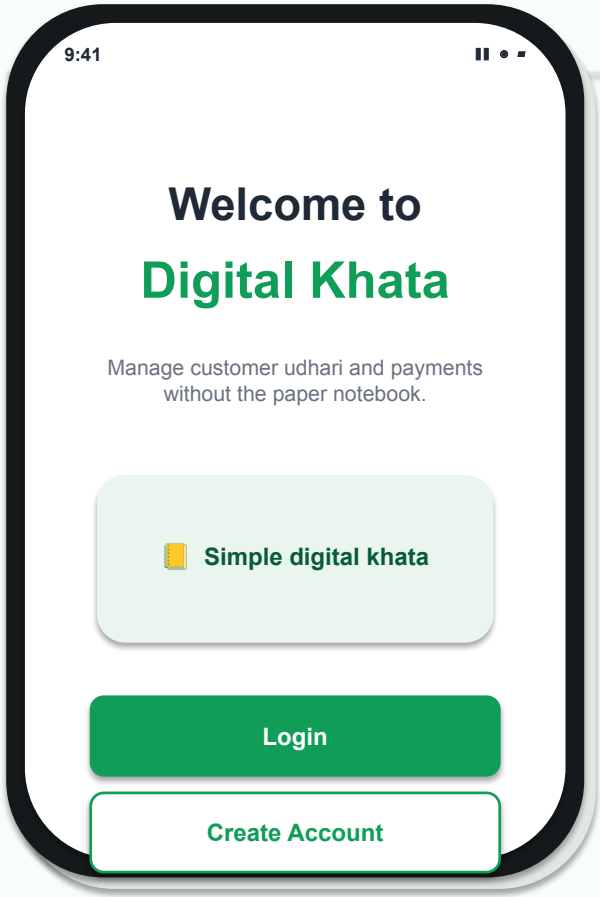

KEY ELEMENTS

1. App logo and Digital Khata name
2. Simple tagline: Udhari ka hisaab, ab aur bhi aasan
3. Light grocery-store illustration
4. Loading indicator
5. Auto-route after authentication check

DEVELOPER NOTES

Show for 1–2 seconds. If logged in → Home; otherwise → Welcome/Login.

02 — Welcome / Get Started

PURPOSE

Digital Khata headline

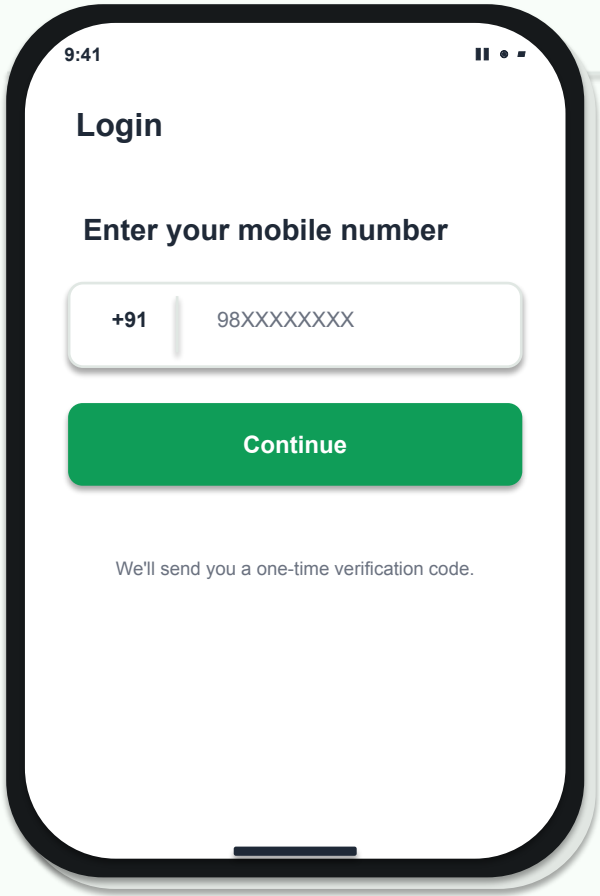

KEY ELEMENTS

1. Digital Khata headline
2. Short value proposition
3. Primary Login button
4. Secondary Create Account button
5. Language selector: English / हिन्दी

DEVELOPER NOTES

Keep onboarding to one screen. Do not add unnecessary carousel screens.

03 — Mobile Number Login

PURPOSE

Mobile number field with +91

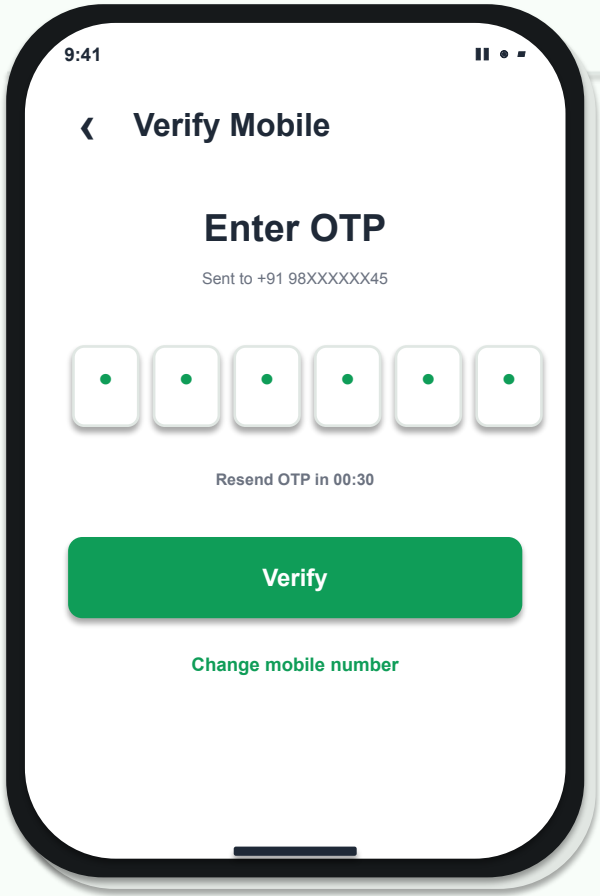

KEY ELEMENTS

1. Mobile number field with +91
2. Continue button
3. Privacy/terms hint
4. Clean single-purpose layout

DEVELOPER NOTES

Validate 10-digit Indian mobile number and trigger OTP API.

04 — OTP Verification

PURPOSE

5–6 digit OTP input

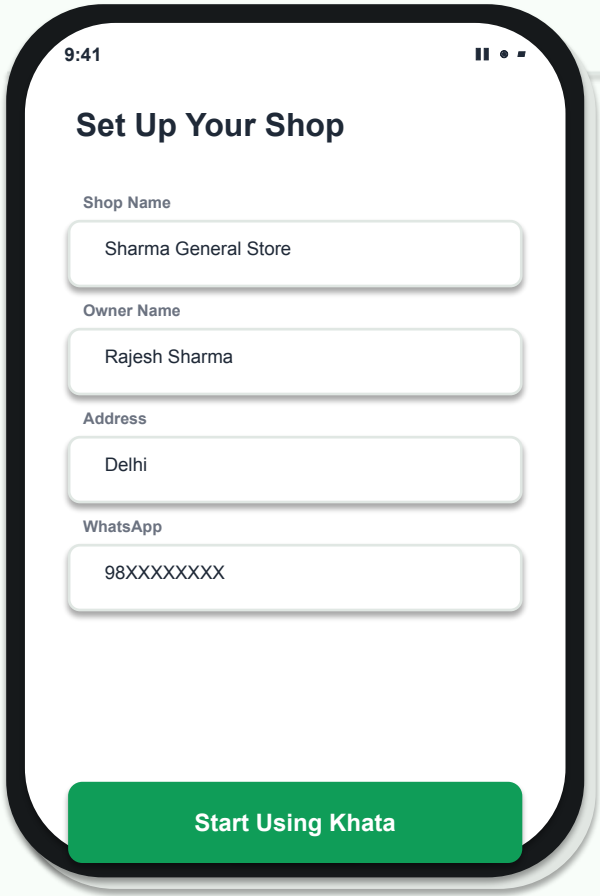

KEY ELEMENTS

1. 5–6 digit OTP input
2. Resend OTP timer
3. Verify button
4. Change number option

DEVELOPER NOTES

Support resend and rate limiting. Route new users to Shop Setup.

05 — Shop Setup

PURPOSE

Shop name

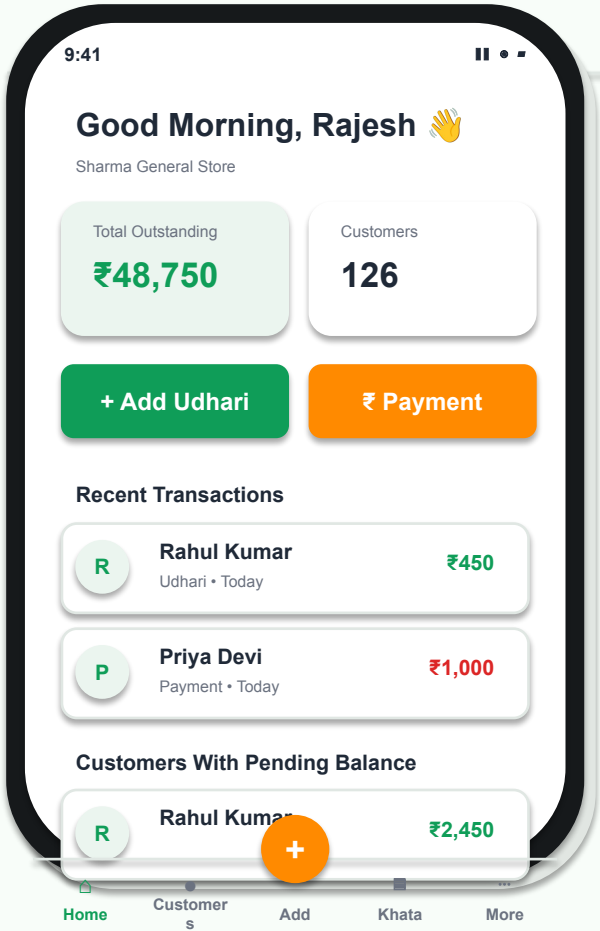

KEY ELEMENTS

1. Shop name
2. Owner name
3. Address
4. WhatsApp number
5. Language

DEVELOPER NOTES

Store shop profile against authenticated owner. WhatsApp can remain optional.

06 — Home Dashboard

PURPOSE

Total outstanding

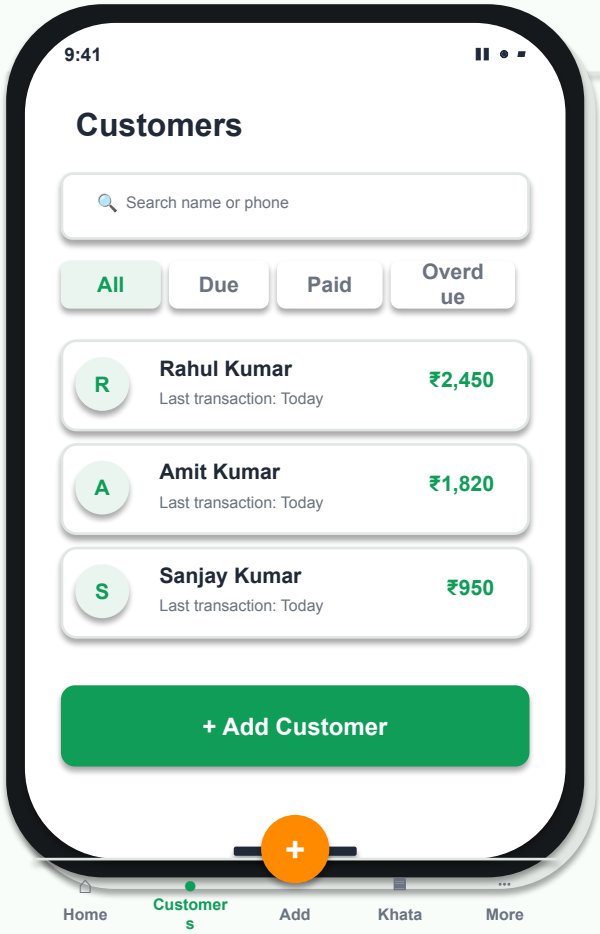

KEY ELEMENTS

1. Total outstanding
2. Customer count
3. Monthly udhari
4. Monthly collection
5. Quick action buttons

DEVELOPER NOTES

Dashboard values come from backend. Add Udhari must always be easy to reach.

07 — Customers

PURPOSE

Search by name/phone

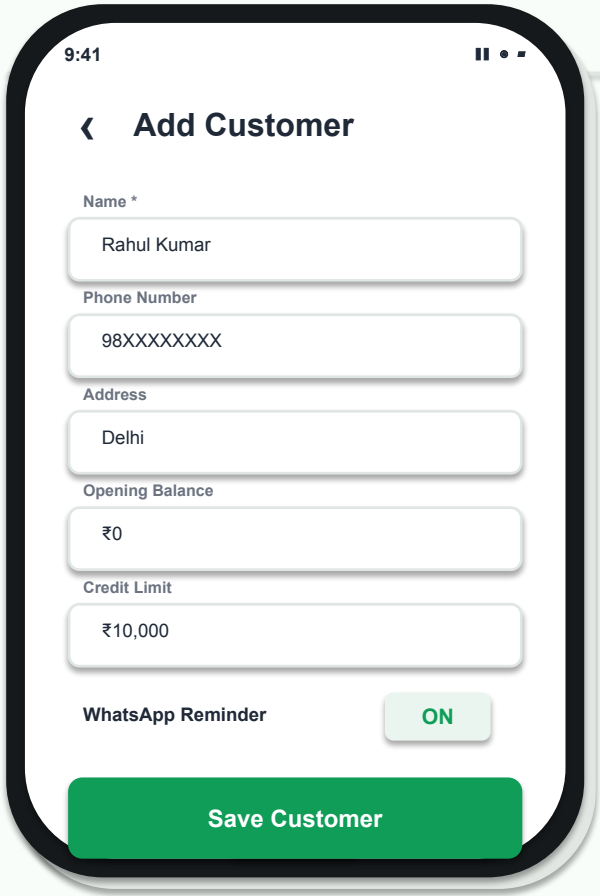

KEY ELEMENTS

1. Search by name/phone
2. All/Due/Paid/Overdue filters
3. Customer cards
4. Outstanding amount
5. Add Customer CTA

DEVELOPER NOTES

Search should be fast and server-side for large customer lists.

08 — Add Customer

PURPOSE

Name

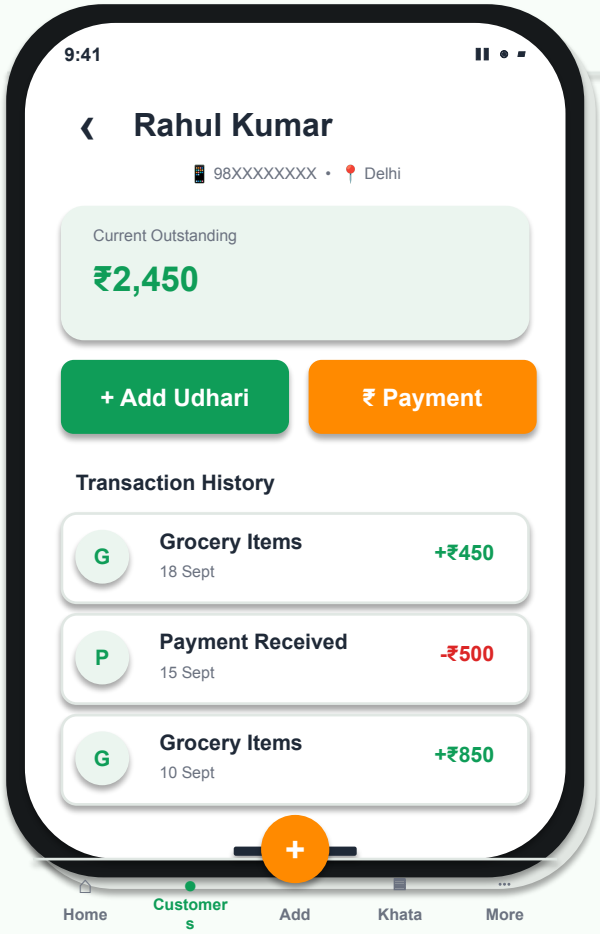

KEY ELEMENTS

1. Name
2. Phone
3. Address
4. Opening balance
5. Credit limit

DEVELOPER NOTES

Name required. Phone optional but required for WhatsApp/SMS delivery.

09 — Customer Profile

PURPOSE

Current outstanding balance

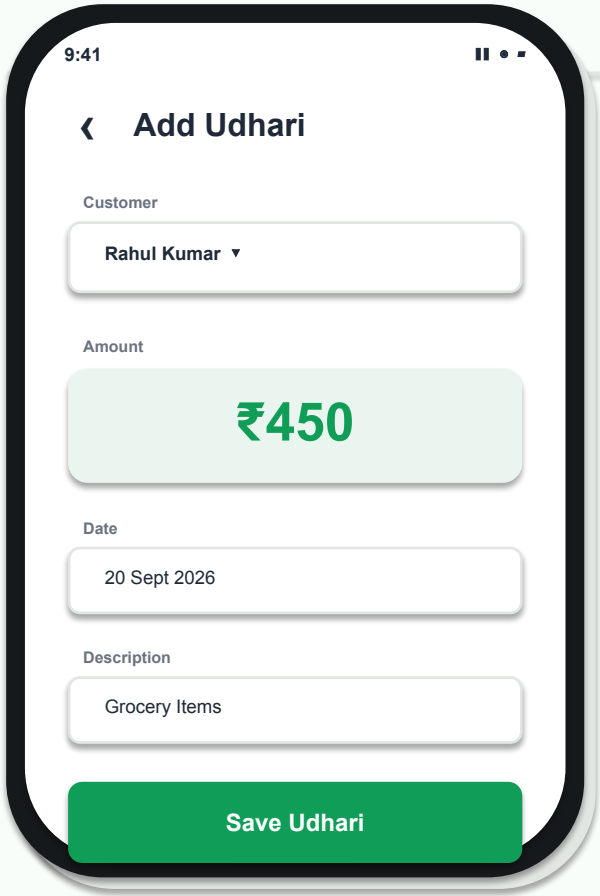

KEY ELEMENTS

1. Current outstanding balance
2. Total udhari
3. Total payments
4. Add Udhari
5. Record Payment

DEVELOPER NOTES

Balance is derived from ledger. Provide edit customer and statement actions.

10 — Add Udhari

PURPOSE

Customer selector

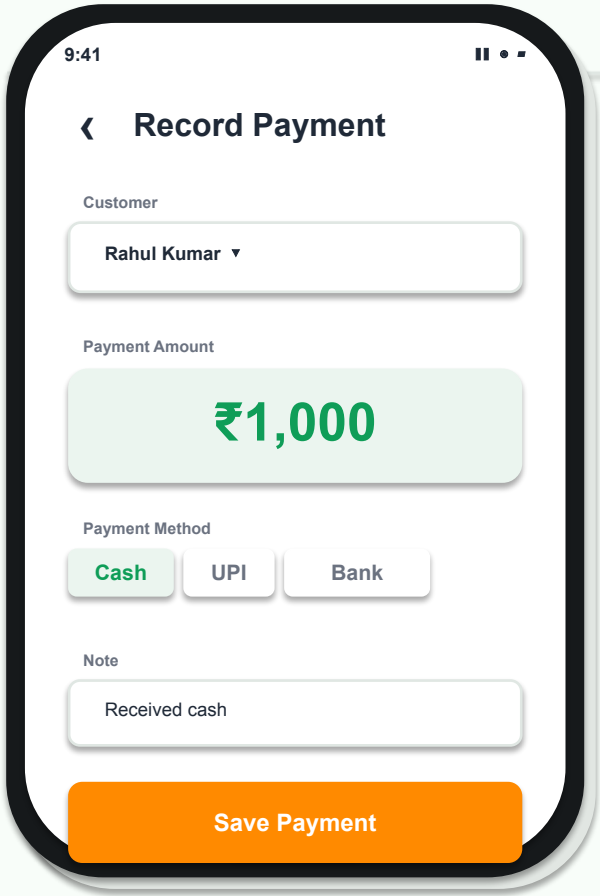

KEY ELEMENTS

1. Customer selector
2. Large amount field
3. Date
4. Description
5. Optional due date

DEVELOPER NOTES

Prevent duplicate submissions with an idempotency key.

11 — Record Payment

PURPOSE

Customer selector

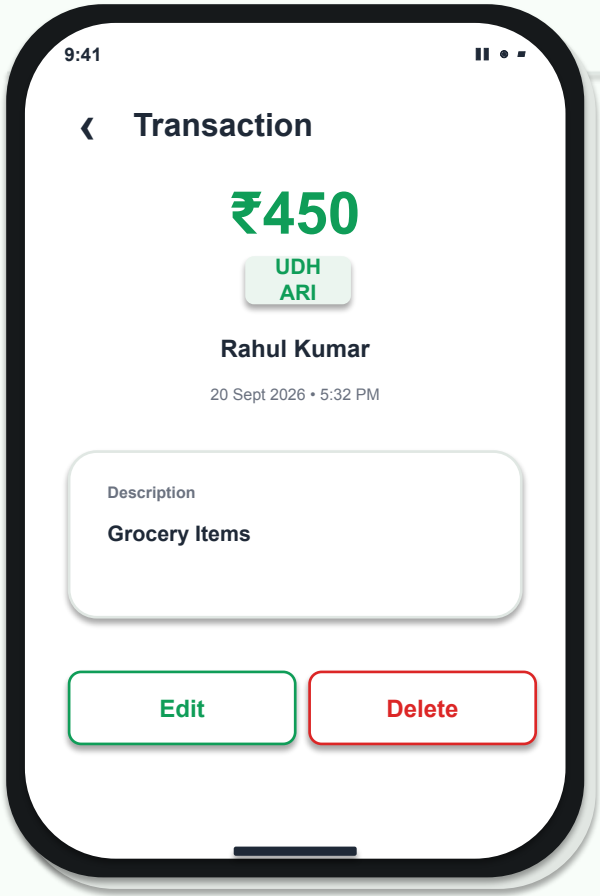

KEY ELEMENTS

1. Customer selector
2. Payment amount
3. Date
4. Cash/UPI/Bank/Other
5. Optional note

DEVELOPER NOTES

Payment must reduce outstanding balance. Server validates amount and customer.

12 — Transaction Detail

PURPOSE

Transaction type

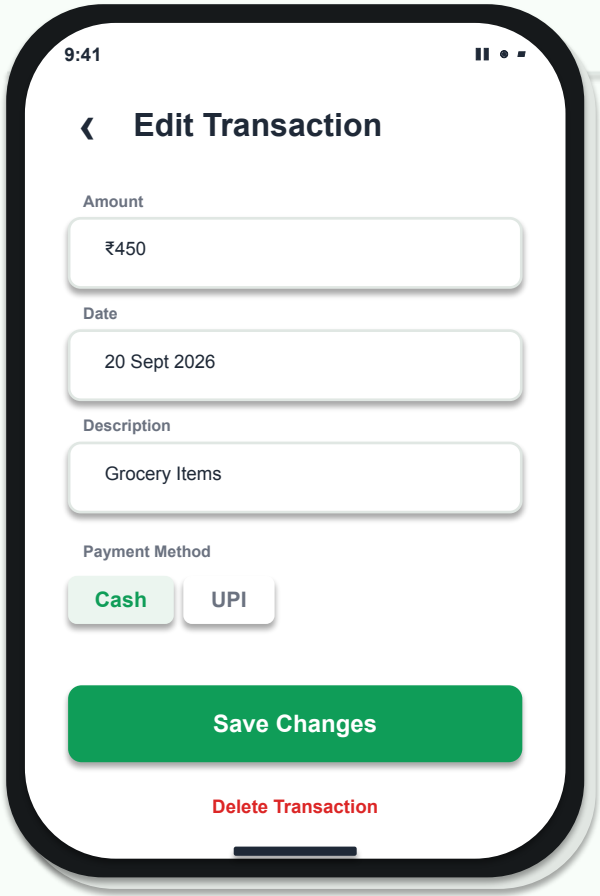

KEY ELEMENTS

1. Transaction type
2. Amount
3. Customer
4. Date/time
5. Description

DEVELOPER NOTES

Deletion must require confirmation and create an audit log.

13 — Edit Transaction

PURPOSE

Editable amount

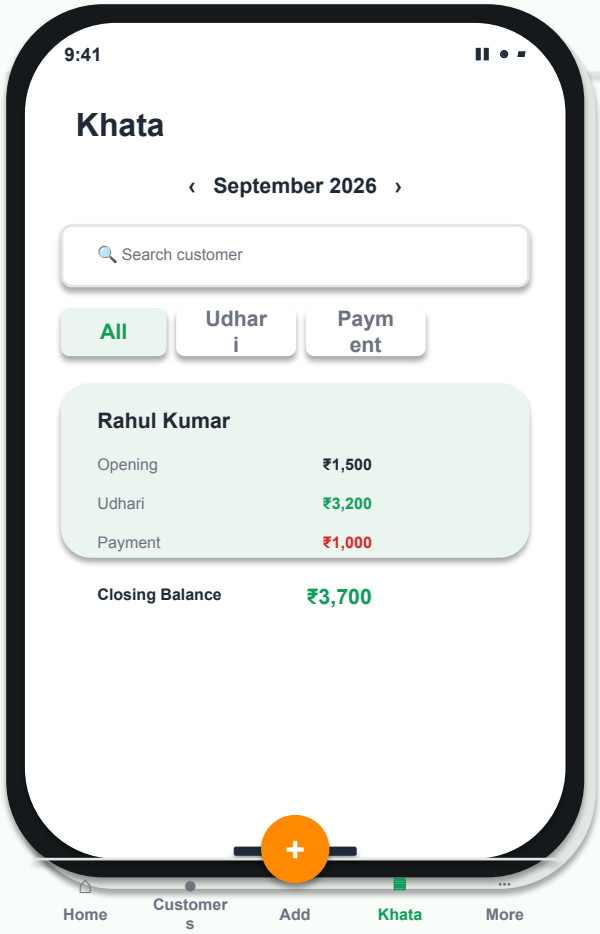

KEY ELEMENTS

1. Editable amount
2. Date
3. Description
4. Payment method
5. Save changes

DEVELOPER NOTES

Never silently alter financial history. Log old and new values.

14 — Khata

PURPOSE

Month selector

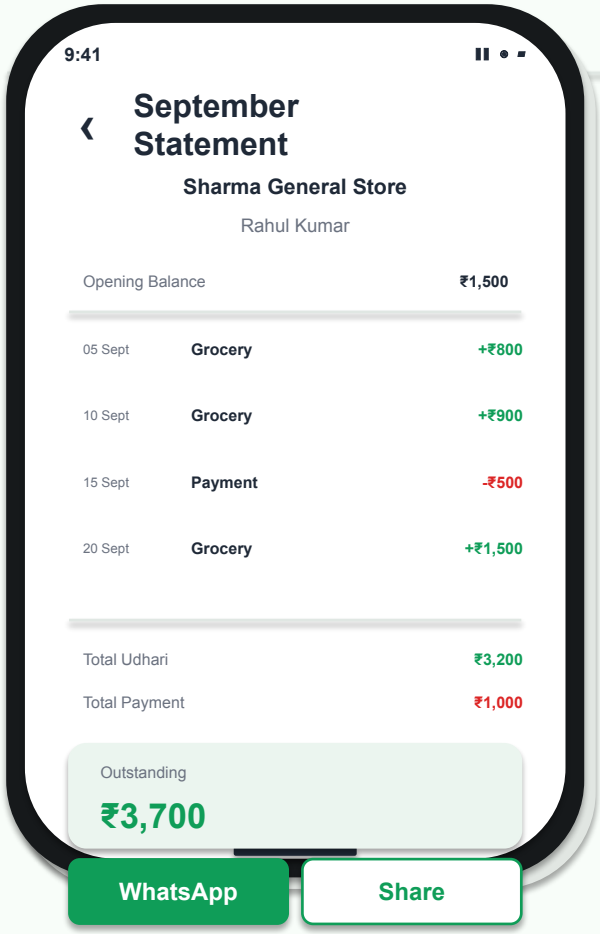

KEY ELEMENTS

1. Month selector
2. Customer search
3. All/Udhari/Payment filters
4. Opening balance
5. Monthly credit

DEVELOPER NOTES

Use the transaction ledger as source of truth for calculations.

15 — Monthly Statement

PURPOSE

Shop identity

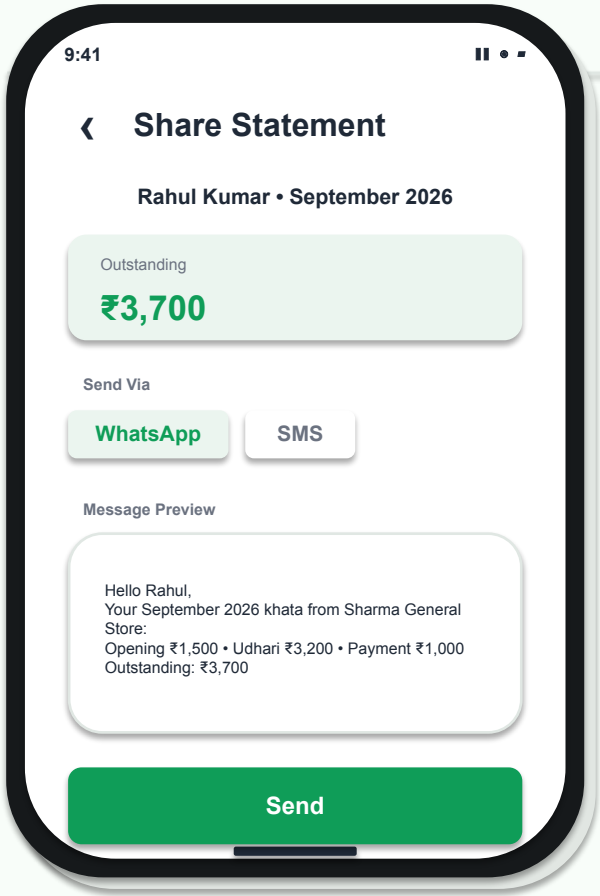

KEY ELEMENTS

1. Shop identity
2. Customer name
3. Opening balance
4. Transaction list
5. Total udhari

DEVELOPER NOTES

Statement formula: Opening + Credits − Payments = Closing.

16 — Share Statement

PURPOSE

Customer and month

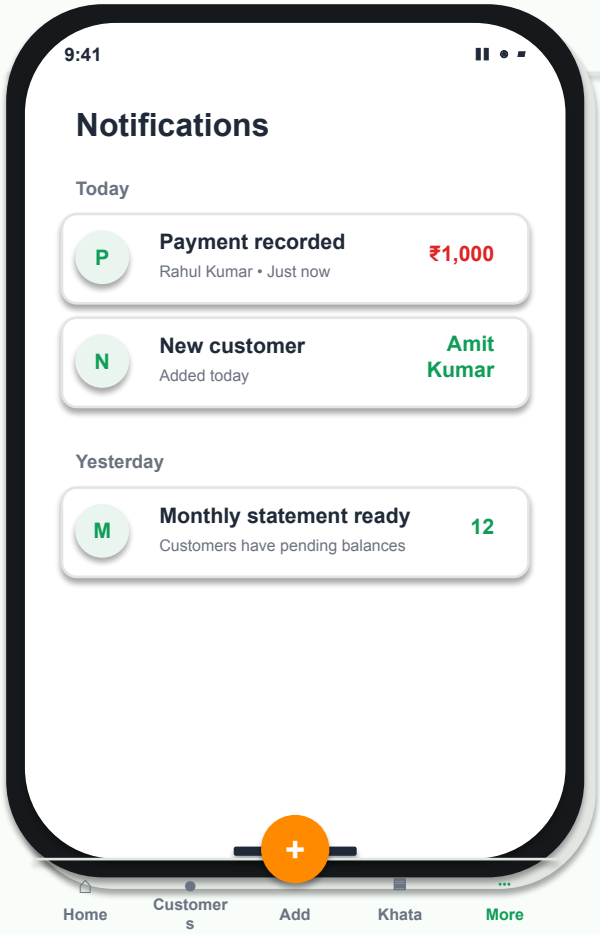

KEY ELEMENTS

1. Customer and month
2. Outstanding amount
3. WhatsApp/SMS options
4. Editable message preview
5. Send button

DEVELOPER NOTES

For MVP, WhatsApp can open a prefilled message. Automated API can be added later.

17 — Notifications

PURPOSE

Payment confirmations

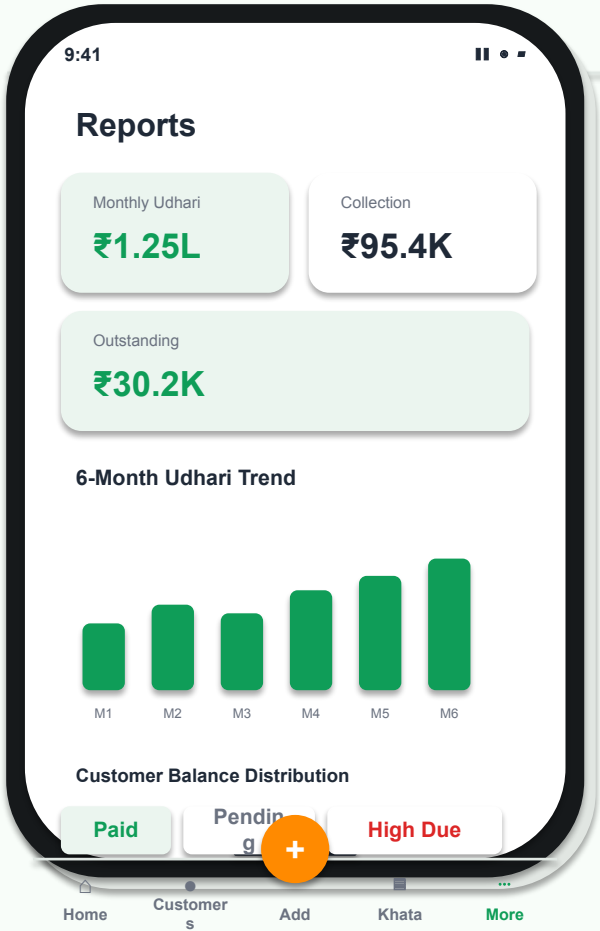

KEY ELEMENTS

1. Payment confirmations
2. New customer notifications
3. Monthly statement readiness
4. Failed delivery notices
5. Read/unread state

DEVELOPER NOTES

Notification center should be lightweight; critical transaction confirmations should be clear.

18 — Reports

PURPOSE

Monthly udhari

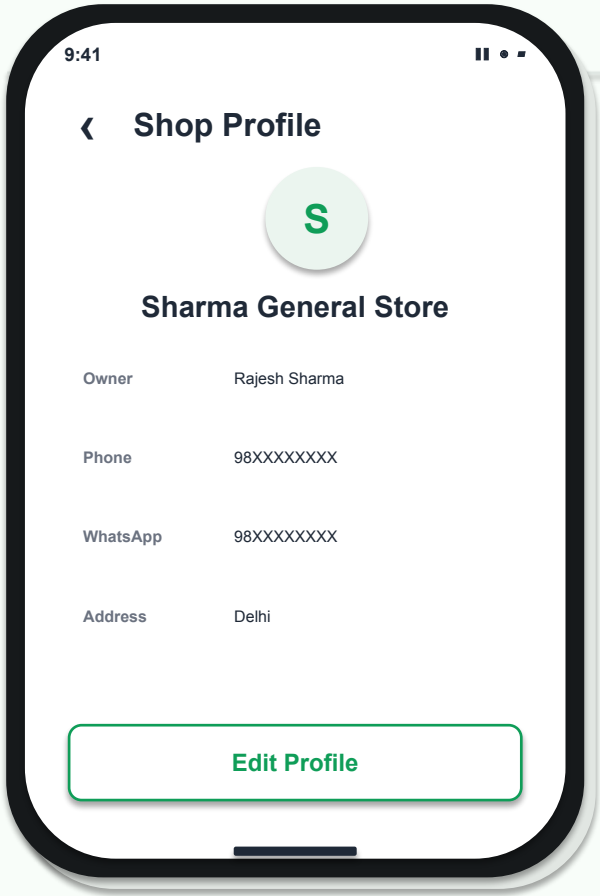

KEY ELEMENTS

1. Monthly udhari
2. Monthly collection
3. Outstanding
4. Active customers
5. 6-month trends

DEVELOPER NOTES

Keep analytics simple in MVP. Avoid accounting complexity.

19 — Shop Profile

PURPOSE

Shop name

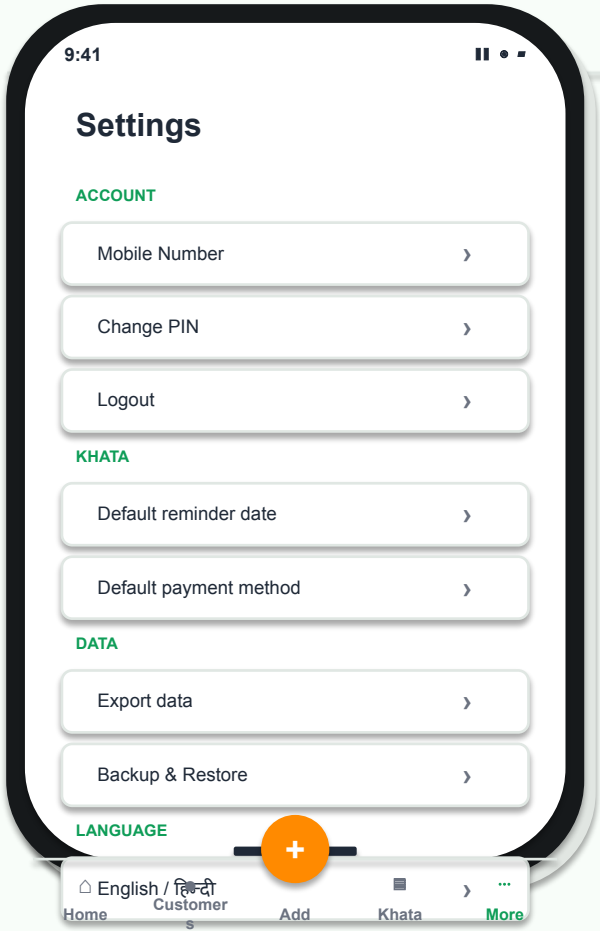

KEY ELEMENTS

1. Shop name
2. Owner
3. Phone
4. WhatsApp
5. Address

DEVELOPER NOTES

Changes should update future statements while preserving historical transaction records.

20 — Settings

PURPOSE

Account

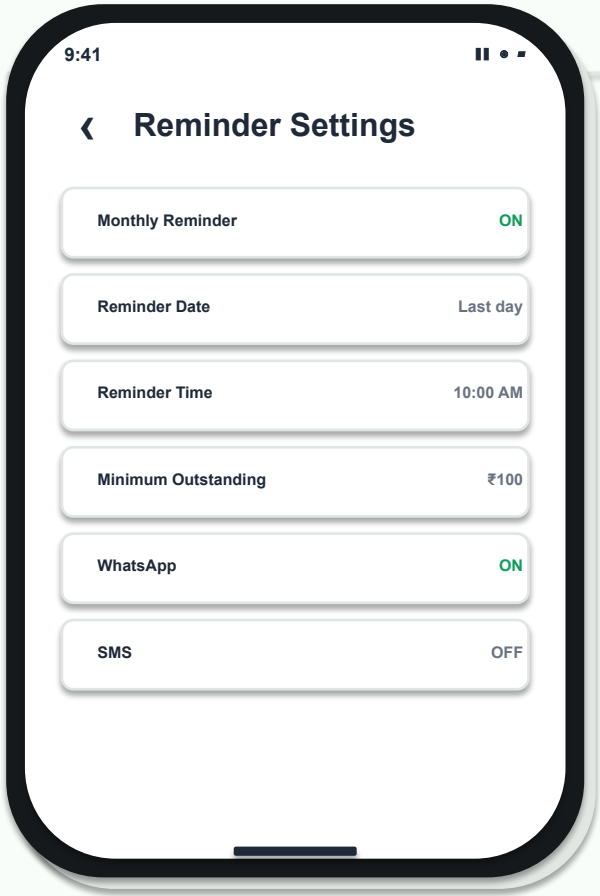

KEY ELEMENTS

1. Account
2. Notifications
3. Khata defaults
4. Data backup/export
5. Language

DEVELOPER NOTES

Separate destructive actions from normal settings.

21 — Notification Settings

PURPOSE

Monthly reminder ON/OFF

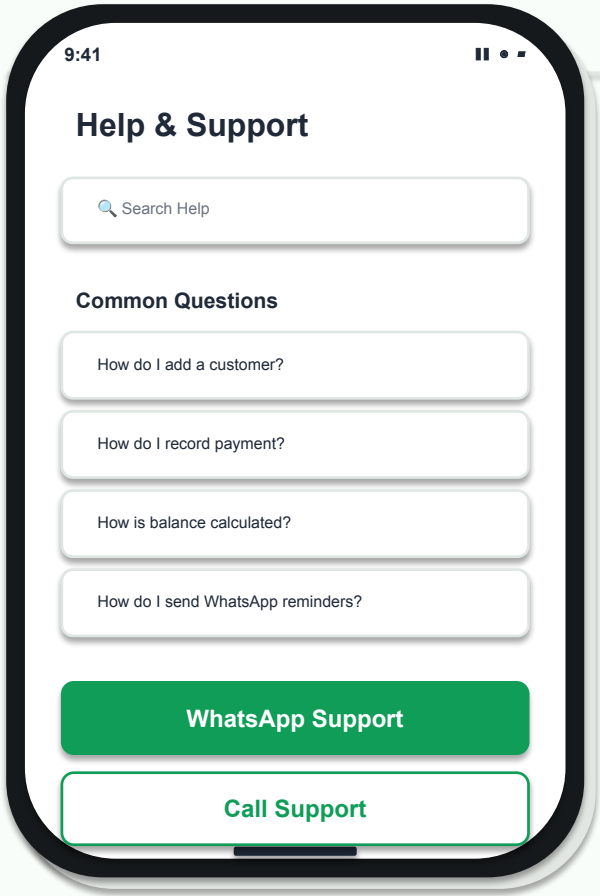

KEY ELEMENTS

1. Monthly reminder ON/OFF
2. Reminder date
3. Reminder time
4. Minimum outstanding threshold
5. WhatsApp/SMS toggles

DEVELOPER NOTES

Respect opt-out and channel preferences. Store settings per shop.

22 — Help & Support

PURPOSE

Search help

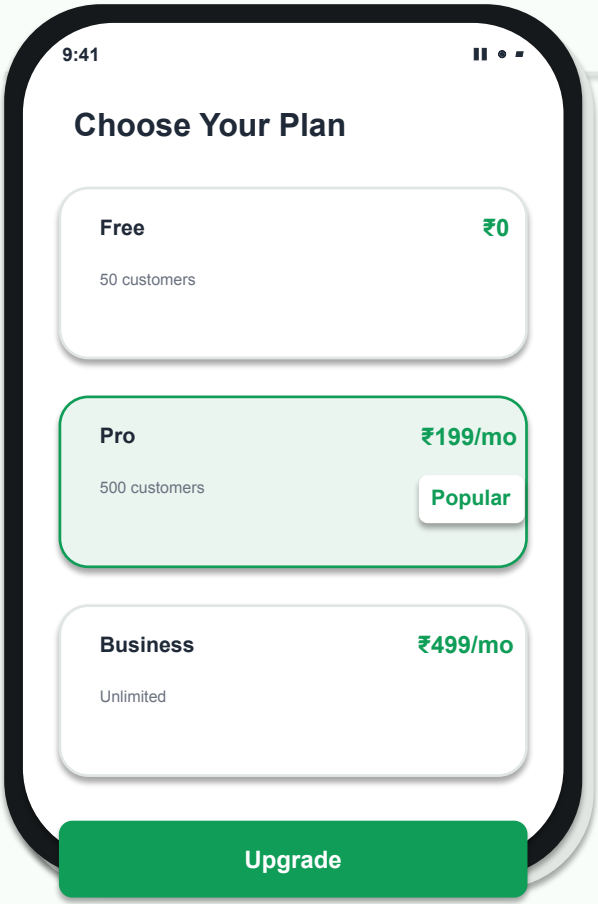

KEY ELEMENTS

1. Search help
2. Common questions
3. How to add customer
4. How balance is calculated
5. WhatsApp support

DEVELOPER NOTES

FAQ content can be managed remotely in a future admin panel.

23 — Subscription

PURPOSE

Free plan

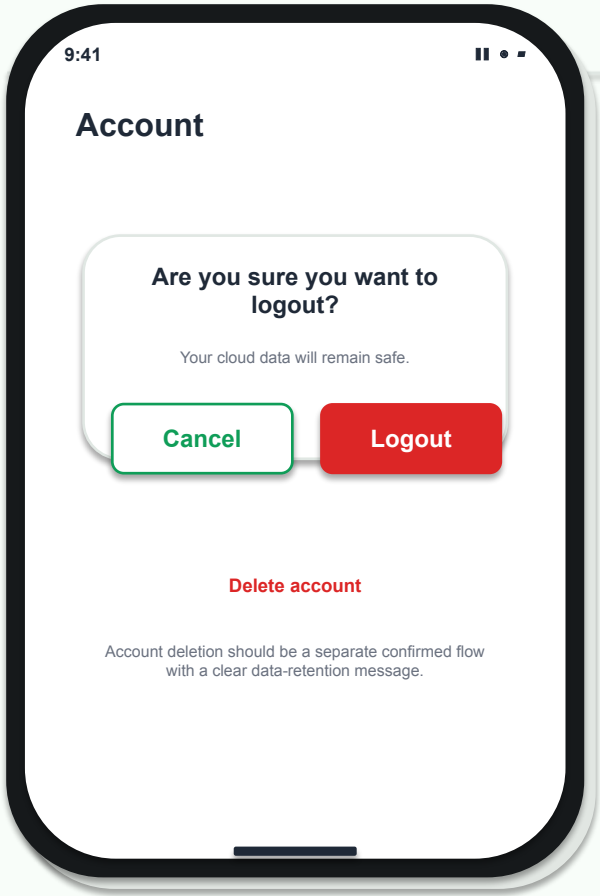

KEY ELEMENTS

1. Free plan
2. Pro plan
3. Business plan
4. Feature comparison
5. Upgrade CTA

DEVELOPER NOTES

Can be hidden in initial launch. Pricing should be configurable remotely.

24 — Logout / Account Actions

PURPOSE

Logout confirmation

KEY ELEMENTS

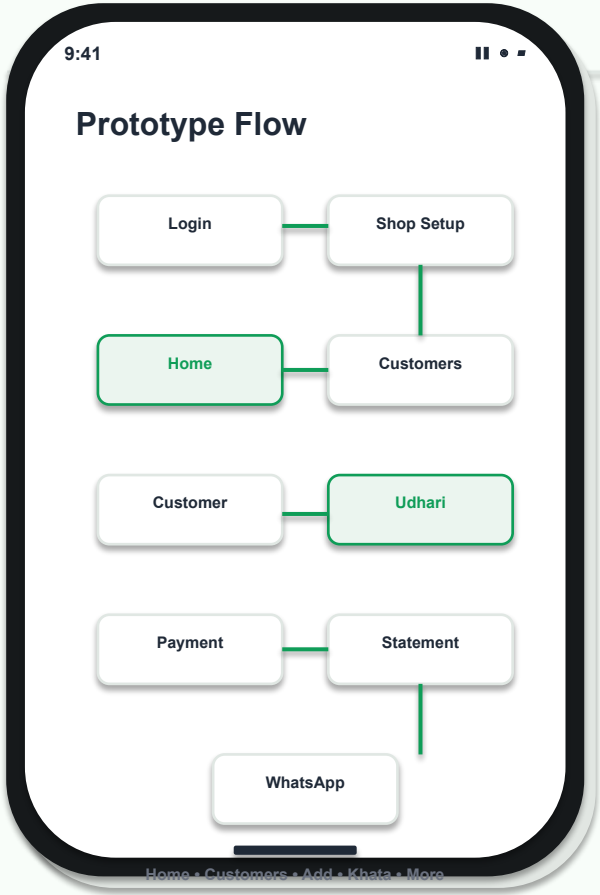

1. Logout confirmation
2. Delete-account pathway
3. Data warning
4. Cancel and confirm actions

DEVELOPER NOTES

Account deletion must require stronger confirmation and follow data-retention policy.

25 — Complete Prototype Flow

Show how all screens connect into the real product.

PURPOSE

Authentication flow

KEY ELEMENTS

1. Authentication flow
2. Customer flow
3. Transaction flow
4. Monthly statement flow
5. Settings flow

DEVELOPER NOTES

Use this slide as the handoff map for Figma prototype links and developer navigation.
